

Your Employment System

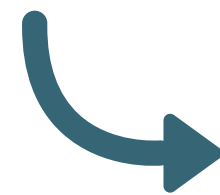

YES

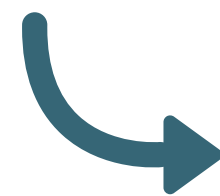

automates the process of matching candidates to job and volunteer openings.

It's a mobile-friendly web application, so it can be accessed anywhere by anyone.

It's paperless and all in one place – no more paper files or Excel sheets to keep track of.

It saves you time and money by helping to manage the overall process more quickly, easily, and accurately.

Built on Experience

Digicon has been working with the Baltimore Mayor's Office of Employment Development (MOED) on its YouthWorks summer employment system since 2011.

We developed a fully online-based solution to streamline, modernize, and generally improve MOED's previously paper-based process. YES was born from our experience with this project.

Before YES...

MOED had:

- * A manual paper application process
- * Thousands of youth records stored on local Excel sheets
- * No automated online system in place

MOED's Growth with Digicon

Youths Placed in Jobs

- * In 2013, MOED placed 5,200 youths in jobs
- * In 2019, MOED placed 10,977 youths in jobs
- * In 2020, MOED placed 5,000 youths in jobs despite the COVID-19 pandemic

YES Functions

Candidates: Self-register, submit their applications, and track them online.

Employers: Self-register, list open positions, and use web conferencing feature to interact virtually with their assigned candidates when needed.

Administrators: Vet and place candidates with employers, edit web pages, and manage back-end functions including lists/templates, batch emails, reporting, and auto-matching.

JOIN OUR CLIENTS

"We have worked closely with Digicon since 2013 to upgrade and simplify our summer jobs registration process.

They have been a tremendous partner in helping us meet our goals."

– Kevin McLamb, IT Director
Baltimore Mayor's Office of Employment Development
